## Experience

**Staff Developer – Full Stack**  
[Lights On Software \(Software Agency\)](#)

**January 2024 — June 2026**  
**Toronto, Canada (Hybrid)**

Worked on projects for clients long term, providing full stack skills, architecture decisions, and knowhow on development.

- ◆ Maintained a good relationship with clients, with always positive feedback.
- ◆ Delivered new features and bug fixes swiftly.

- ◆ Helped guide the future of new and existing projects.

## Clients

### Saris AI (AI FinTech)

January 2026 — April 2026

Worked creating AI based automation tools for financial institutions to improve backoffice speed.

- ◆ Delivered a new feature in the second week of work.
- ◆ Integrated LLM calls into new workflows for data analysis.
- ◆ Built integration with two third party service APIs.
- ◆ Improved accuracy on data analysis for an existing workflow.

### Tenstorrent (AI Hardware Manufacturer)

January 2024 — January 2026

Worked on data visualization tools for analyzing large performance datasets.

- ◆ Improved performance of [data heavy react app](#) from 1 minute to under 3 seconds.
- ◆ Implemented UI and logic for syncing app data via SSH with fallback strategies.
- ◆ Forked a [Google project](#) and added features to it while maintaining more than 95% compatibility.
- ◆ Integrated existing project into a new application and helped plan the merge of two applications into one.
- ◆ Implemented data analysis app with “human in the loop” model for quick feedback on data changes.
- ◆ improved semantic and WCAG compliance of existing app.

## Senior Backend Developer

March 2021 — December 2023

### Moka/Mogo (Stock trading application)

Toronto, Canada (Remote)

Responsible for writing backend code, communicate with the finance team, and bridge communications between teams in Canada and Europe.

- ◆ Improved delivery time of the project by acting as Scrum Master and managing tasks for the team.
- ◆ Responsible for improving the core product backend and improving experience for users across Canada and Europe.
- ◆ Reduced costs with third-party services by refactoring part of the application and removing redundant calls to external services.
- ◆ Improved delivery time by acting as a scrum master, where I improved visibility on project status and current bugs.

- ◆ Facilitated knowledge sharing between team members and worked as an onboarding partner for three new team members.
- ◆ Built and deployed a greenfield application APIs using Docker and Node.js.
- ◆ Implemented AWS lambdas to process a pipeline to buy and sell on the stock market.
- ◆ Worked on integration with third party provides, including Braze and Contentful, to provide backend proxies to those providers.

## Senior Full Stack Developer

October 2020 — March 2021

[Drag App \(Gmail integration app\)](#)

UK (Remote)

Responsible for improving the application code and implementing new features.

- ◆ Improved application load times by 20%, making the user experience smoother.
- ◆ Refactored and consolidated multiple components to share code, improving code maintainability and design consistency.
- ◆ Refactored the codebase to remove old dependencies, improving reliability, UI semantic and WCAG compliance.

## Web Application Developer

May 2020 — October 2020

[DomPixel \(Design and software agency\)](#)

Brazil (In-Person)

Planned, designed, and implemented multiple web sites and applications for clients.

- ◆ Introduced scrum methodology to the development team, improving delivery times and reliability.
- ◆ Architected an extensible date-tracking system engine from the ground up, designing the underlying data structure and state management for optimal query performance and observability.
- ◆ Built UIs with focus on accessibility and WCAG compliance.

## Coding School Coordinator

June 2018 — May 2020

[Happy Code \(Coding school for kids\)](#)

Brazil (In-Person)

Coordinated a team of teachers, ensuring student satisfaction, program and calendar planning, and teaching classes.

- ◆ Kept good relationship with parents, listening to feedback and ensuring satisfaction.
- ◆ Improved school schedule organization, eliminating issues with double booking of demonstrative classes and increasing client conversion.
- ◆ Kept the team motivated, providing coaching sessions to improve their skills.

## Mobile Developer

March 2017 — February 2018

Kashew Tecnologia (Design and software agency)

Brazil (In-Person)

Implemented mobile apps using cross platform tools, using a wrapper for web application. With focus in compatibility between OSes.

- ◆ Improved communication between development team and key project stakeholders.
- ◆ Oversaw the release of a complex feature under a tight schedule, with maintainable and testable code.

## Intern Web Developer

February 2014 — February 2015

UFMT – Universidade Federal do Mato Grosso  
(Internship at university)

Brazil (In-Person)

Created and deployed a news blog for the university's research projects.

- ◆ Created customized Wordpress theme from the ground up.
- ◆ Ensured browser compatibility and accessibility for the existing design.

## Web Developer

September 2009 — September 2010

W3 Sites (Design and software Agency)

Brazil (In-Person)

Maintained existing websites and implement newer websites based on provided designs.

- ◆ Implemented "Address Book" website with search features in PHP.

# Education

## Post-Graduation in Agile Methodologies

Unicesumar

- ◆ Wrote a case study of the results of implementing scrum on the team I was working with at the time.

## B.Sc. in Computer Science

Universidade de Cuiabá

- ◆ Worked in academic research on usability, accessibility, and user experience.
- ◆ Published 3 research papers in Human-Computer Interaction (HCI).

# Volunteering

## Dev Community Volunteer [Toronto Javascript](#)

November 2022 — September 2025

Organized and hosted events for the community.

- ◆ Led the initial architecture and development of an internal volunteer management platform, defining system architecture, data models, and component libraries while mentoring 10 junior developers.
- ◆ Presented in 4 talks at "Teck Talk" events.
- ◆ Hosted "Code Club" event focused on mob programming and pair coding for 2 years.

## Adults Leadership Trainer/Scout Leader [Boy Scouts of Brazil](#)

October 2013 — January 2021

Responsible for lectures and courses with adults; and planning and execution of activities with kids.

- ◆ Helped streamline the scout group structure and improve engagement from parents.
- ◆ Lectured at conferences and courses on how to build team cohesion and plan and organize activities for kids.
- ◆ Planned, managed, and executed large scale activities involving more than 20 volunteers and 300 kids.
- ◆ Assisted other scout groups in organizing and planning activities for kids.
